BILGE
Tente - Pergola

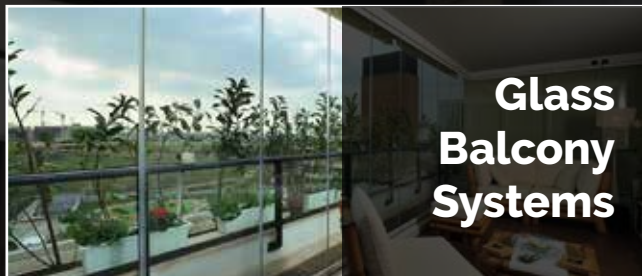

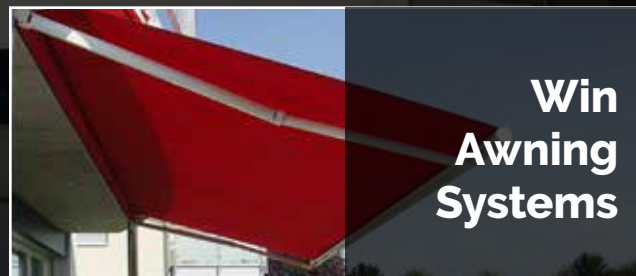

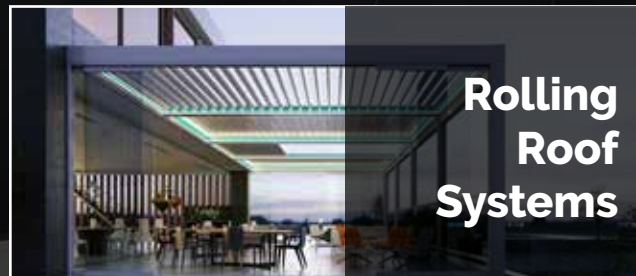

changing and developing fields for life...

As Bilge Pergola Awning Shading Systems, we have been advancing on the path of the leading company that has been shaping the sector with its knowledge and experience in Istanbul since 2003. Always keeping customer satisfaction at the forefront of the services we have provided from the assembly to the service stage with our solution-oriented team. We continue on our way with the trust of our valued customers, who add strength to our strength.

PRODUCTS

Bilge Tente - Pergola meets your expectations by developing different products for every space with solutions that will bring your creativity to the fore and make your dreams come true. Commercial or residential versatile solution with different services offered to each area.

Pergola Awning Systems

It is an ergonomic and functional awning system that can be applied without the need for a building permit, designed as fully automatic opening and closing.

Rolling Roof Systems

Aluminum panels can open the desired angle and provide daylight, ventilation and shading. Open angled panels prevent water in rainy weather while ventilating the interior. All kinds of interior lighting and heating systems can be applied to the ceiling.

Bellows Awning Systems

The Bellows Awning System is opened and closed in accordion form. The difference from other awnings is that the side parts are closed, preventing the sun and rain from coming. It adds a different visuality to the area where it is located with its stylish design and design in the areas where it is used.

Articulated Awning Systems

Articulated Awning is an extremely practical and economical awning model that can be preferred with manual or motor. It has fabrics that are resistant to chemicals and mold that block harmful UV rays.

Win Awning Systems

Wintent window awning, application area is wide. It is also preferred in Wintent windows or shop windows and balconies. The system can be used motorized and manually. The window awning adds an aesthetic appearance to your space, apart from sun shading.

“ Photocell Door Systems

Automatic doors provide smooth entry and exit even during peak hours of pedestrian traffic. Photocell doors are used in workplaces, markets, restaurants, hotels, shopping centers, hospitals and public buildings. Automatic doors are user-friendly, suitable for all architectural designs.

Glass Balcony Systems

Folding glass balcony systems combine simplicity with style. We offer an easy-to-install and durable line with a range of high-quality, attractive design options to personalize the look of your home. Our technical experts will surely provide you with the right solution.

Guillotine Glass Systems

Smoothly working telescopic guillotine glasses make a wonderful addition to any contemporary architectural design. In addition to being a quality solution for your high production standard guillotine glass system, it shows optimum performance in thermal insulation, solar gain and transparency.

Winter Garden Systems

Specially designed houses, offices and gardens for people who cannot sit in the garden of the house during the winter months allow you to spend time comfortably in the garden of the house without the feeling of cold. You can enjoy the rain while sipping your hot coffee in your garden.
